ABOUT ME

Software Developer with 1 year of experience in web application development using Angular, React, and Node.js.

EXPERIENCE

Software Developer – QubeRoot Analytics

July 2025 – Present (1 Year Experience)

- Developed dynamic web applications using Angular and React
- Built and integrated backend services using Node.js and Go (Golang)
- Designed and consumed RESTful APIs for seamless frontend-backend communication
- Worked with SQL Server (SSMS) for database operations and data management
- Debugged and optimized applications to improve performance and reliability
- Collaborated with team using Git for version control

Operations Assistant – ITC Filtrona Pvt. Ltd.

January 2022 – January 2023

- Managed severe handling processes to ensure smooth daily operations.
- Performed raw material data entry, maintaining accuracy in records and reports.
- Generated bills and invoices, ensuring timely processing and compliance.

Skills: Billing, Data Entry, Server Management, Attention to Detail, Operations Handling

EDUCATION

2023 - 2025 BACHELOR OF ENGINEERING IN COMPUTER SCIENCE

SJCIT, CHIKKABALLAPUR

GPA : 8.89/10

2018 - 2021 DIPLOMA IN COMPUTER SCIENCE & ENGG

GOVT POLYTECHNIC, CHITAMANI

GPA : 78.16

PROJECTS

ONLINE VOTING SYSTEM.

- Python: Used for backend development to handle logic, authentication, and data processing.
- MySQL: Managed database operations for storing voter information, election details, and results securely.
- JavaScript: Enabled dynamic and interactive user interfaces for a seamless voting experience.

CLASSIFICATION OF BRAIN TUMOR IN MRI IMAGES USING DL ALGORITHMS

- Python: Used for implementing deep learning algorithms and managing system logic.
- Flask: Developed a web-based interface for user-friendly MRI image uploads and result visualization.
- VGG16 (CNN Model).
- OpenCV: Applied image preprocessing techniques to enhance MRI scan quality before classification.
- Matplotlib : Visualized classification results and symptom values in graphical format.

PERSONALITY PREDICTION SYSTEM USING CV ANALYSIS

- Python: Implemented machine learning algorithms for personality prediction based on CV analysis.
- Flask: Developed a web-based platform for uploading resumes and displaying personality predictions.
- Natural Language Processing (NLP): Extracted and analyzed key features from resumes to infer personality traits.

SKILLS

- Programming Languages: JavaScript, TypeScript, Python, Go (Golang)
- Frontend Technologies: Angular, React, HTML, CSS
- Backend Technologies: Node.js, Express.js, Go (REST APIs)
- Database: MySQL, SQL Server (SSMS)
- Tools: Git, VS Code
- Concepts: REST APIs, Component-Based Architecture
- Soft Skills: Problem Solving, Teamwork, Communication

INTERNSHIP

Programming & Development Intern

CONTRIVER | October 2024 – March 2025

- Completed training in Python, Machine Learning, Artificial Intelligence, Full Stack Web Development, and Data Science.
- Developed a project on Personality Prediction using CV Analysis, applying AI and NLP techniques to analyze resumes and predict personality traits.
- Gained hands-on experience in building web applications, training machine learning models, and working with data analysis tools.
